CAREER PROFILE

Fourth-year Computer Science student at Angeles University Foundation and DOST-SEI scholar with hands-on experience in full-stack web development, Flutter mobile UI, and machine learning. Drawn to building accessible, socially driven technology for underserved communities, from AI care tools for migrant caregivers to affordable nutrition planning for Filipino families. Seeking an internship / OJT to apply and grow these skills in a professional team.

EDUCATION

B.S. in Computer Science | Angeles University Foundation | 4th Year, A.Y. 2026–2027
Expected Graduation: 2027

- **Relevant Coursework:** Machine Learning, Intelligent Systems, Software Engineering, Data Structures & Algorithms.
- **Transfer Credits:** Completed 1st Year B.S. in Computer Science at Saint Louis University, Baguio City.

KEY PROJECTS

Kain: A Price-Optimized Nutrition Engine for Filipino Families | Developer, Planning & Documentation
Enactus Philippines National Competition and Innovation Summit 2026 — Early-Stage Project Competition Track

- Placed in the Top 30 teams out of 200+ higher education institutions nationwide in the Early-Stage Project Competition Track.
- Contributed to development of a nutrition engine that helps Filipino families plan nutritious meals within their budget by optimizing for food prices.
- Led project planning and documentation, shaping the problem framing, solution scope, and competition submission materials.

Kalinga: AI Care Companion for Migrant Caregivers | Frontend Developer & Planning Contributor
Taiwan Presidential Hackathon — International Track

- Helped plan the project, defining the problem, stakeholders, and MVP scope for an AI app supporting migrant caregivers in Taiwan.
- Built the front-end UI for a multi-screen, multilingual Flutter mobile app with offline-first support.

SCHOLARSHIPS & AWARDS

- **Top 30 Team,** Enactus Philippines National Competition 2026 (Early-Stage Project Track), among 200+ HEIs nationwide.
- **DOST-SEI Undergraduate Scholar (RA 7687),** Department of Science and Technology – Science Education Institute. Merit-based national science scholarship, 2023 – Present.

SKILLS

- **Full-Stack Web Development:** Responsive web applications and secure RESTful APIs using Node.js (Express.js), Vanilla JavaScript, and PostgreSQL.
- **Mobile & UI Development:** Flutter mobile interfaces; desktop GUIs with Tkinter and CustomTkinter; UI prototyping and mockups in Figma.
- **Machine Learning & Data Analysis:** Developing, training, and evaluating predictive models; data preprocessing and visualization with Python (pandas, NumPy, scikit-learn).
- **Technical Documentation:** System documentation, architectural overviews, and literature reviews for software projects.
- **Languages:** Python, Java, JavaScript, C#, C++, Dart
- **Tools & Platforms:** Git, GitHub, VS Code, Figma, Claude Code, Project Management Platforms
