EDUCATION

B.S. in Computer Science | Angeles University Foundation | 4th Year, A.Y. 2025–2026

Expected Graduation: 2027

- **Relevant Coursework:** Machine Learning, Intelligent Systems, Software Engineering, Data Structures & Algorithms.
- **Transfer Credits:** Completed 1st Year B.S. in Computer Science at Saint Louis University, Baguio City.

KEY PROJECTS

Kalinga — AI Care Companion for Migrant Caregivers

Frontend Developer & Planning Contributor | Presidential Hackathon (International Track)

- Took part in the project's initial planning phase: defined the problem statement, mapped stakeholders (caregivers, elderly patients, families, government helplines), and scoped the MVP feature set for submission to the Presidential Hackathon, International Track.
- Designed and implemented the front-end UI/UX for a multi-screen Flutter mobile app, translating the Kalinga design system (typography, color palette, branding) into onboarding, patient-profile, daily check-in, medication-tracking, and emergency-help flows.
- Built multilingual interfaces (Filipino, Bisaya, Bahasa Indonesia, Vietnamese, Mandarin) supporting offline-first use, aimed at accessibility for low-literacy and low-connectivity users.

SCHOLARSHIPS & AWARDS

- **DOST-SEI Undergraduate Scholar (RA 7687)** — Department of Science and Technology, Science Education Institute. Merit-based national science scholarship for Science and Technology students. **2023 – Present.**

CORE COMPETENCIES & SERVICES OFFERED

- **Full-Stack Web Development:** Building responsive web applications and secure RESTful APIs using Node.js (Express.js), Vanilla JavaScript, and PostgreSQL.
- **Machine Learning & Data Analysis:** Developing, training, and evaluating predictive models; data preprocessing, engineering, and visualization using Python (pandas, numpy, scikit-learn).
- **Software & UI Development:** Building standalone desktop applications and intuitive graphical user interfaces using Tkinter and CustomTkinter; proficient in VS Code environments. Designing UI elements, prototyping and generating mockups via Figma.
- **Technical Documentation:** Writing structured system documentation, architectural overviews, and literature reviews for complex software projects.

TECHNICAL SKILLS

- **Languages:** Python, Java, JavaScript, C#, C++, Dart
- **Libraries/Frameworks:** Scikit-learn, Pandas, NumPy, Seaborn, Tkinter, Flutter
- **Tools & Platforms:** Git, GitHub, VS Code, Figma, Claude Code, Project Management Platforms
